

**Dr. Burcin Bozal-Palabiyik** is research assistant at Ankara University, Faculty of Pharmacy Department of Analytical Chemistry, in Turkey. She received her MSc and PhD degrees from Faculty of Pharmacy, Ankara University in 2009 and 2015, respectively. Her research interests are electroanalytical methods, pharmaceutical analysis, sensors based on nanomaterials and biosensors. She completed her postdoctoral studies in Department of Analytical Chemistry, University of Florence with Prof. Dr. Giovanna Marrazza. Her research was on synthetic receptors for biosensor development in order to detect cancer biomarkers and these studies were financed by Scientific and Technological Research Council of Turkey.
